From Wikipedia, the free encyclopedia

Educational assessment is the process of [documenting](#), usually in measurable terms, [knowledge](#), [skills](#), [attitudes](#), and [beliefs](#). Assessment can focus on the individual learner, the learning community (class, workshop, or other organized group of learners), the institution, or the educational system as a whole (also known as [granularity](#)).^{[[summarized](#)]} According to the *Academic Exchange Quarterly*: "Studies of a theoretical or empirical nature (including case studies, portfolio studies, exploratory, or experimental work) addressing the assessment of learner aptitude and preparation, motivation and learning styles, learning outcomes in achievement and satisfaction in different educational contexts are all welcome, as are studies addressing issues of measurable standards and benchmarks".^[1]

The final purposes and assessment practices in education depends on the *theoretical framework* of the practitioners and researchers, their assumptions and beliefs about the nature of human mind, the origin of knowledge and the process of learning.

Contents

- 1 Alternate meanings
- 2 Types
 - 2.1 Initial, formative and summative
 - 2.2 Objective and subjective
 - 2.3 Basis of comparison
 - 2.4 Informal and formal
 - 2.5 Internal and external
